## JUTE BATCHING OIL

---

**SECTION 1:****PRODUCT AND COMPANY IDENTIFICATION**

---

Product Name	JUTE BATCHING OIL		
Manufacturer	Hindustan Petroleum Corporation Limited Malkapuram, Visakhapatnam-530011		
Chemical Family	Petroleum Hydrocarbons		
Product Type	Process Oil		
Emergency Phone No.	(0891)2894843 (0891)2894444		

**NFPA Hazard Identification**

Hazard  
Blue - Health  
Red - Flammability  
Yellow - Reactivity  
White - Special

Degree of Hazard  
0 - Least  
1 - Slight  
2 - Moderate  
3 - High  
4 - Extreme

---

**SECTION 2:****COMPOSITION / INFORMATION ON INGREDIENTS**

---

**Hazardous Ingredients**

The composition of this product is proprietary information. In general, the product does not contain any component that may be a significant health and safety hazard as long as normal precautions in handling petroleum products are observed and good standards of industrial and personal hygiene are maintained. However, in the event of a medical emergency, compositional information will be provided to the attending physician or nurse if necessary.

---

**SECTION 3:****HAZARDS IDENTIFICATION**

---

Primary Entry Routes	Eye contact, skin contact or absorption, inhalation of vapors
Target Organs	Eyes, skin, respiratory system
Eye Contact	Slightly irritating on direct contact
Skin Contact	Low order of toxicity. However, like other petroleum-based products, prolonged or repeated contact may result in the defatting of skin, leading to irritation and possibly dermatitis.

**HINDUSTAN PETROLEUM CORPORATION LIMITED  
VISAKHA REFINERY  
MATERIAL SAFETY DATA SHEET**

**Inhalation**

Negligible hazard at ambient temperature (-18 to 38 °C; 0 to 100 °F). However, if this product is overheated, especially in the presence of water, hydrogen sulfide may be released; this can cause respiratory.

collapse, coma and death without necessarily any warning odor being sensed. Furthermore, overexposure to oil mists may result in droplet deposition, oil granuloma formation, inflammation and increased incidence of infection.

**Ingestion**

Minimal toxicity

**Workplace Exposure Limits**

Due to oil-based components of the product, exposure to oil mist or vapors should be controlled to 5 mg/m<sup>3</sup> or less.

---

**SECTION 4:****FIRST AID MEASURES****Eye Contact**

Immediately flush eyes with large amount of water for at least 15 minutes or until irritation subsides. If irritation persists, get prompt medical attention.

**Skin Contact**

Immediately flush with large amount of water; use soap if available. Remove contaminated clothing, including shoes, and launder before reuse.

**Inhalation**

This product has a low vapor pressure and is not expected to present an inhalation problem at ambient temperature. However, if overexposed to oil mist, using proper respiratory protection, immediately remove the affected person immediately to fresh air. Administer artificial respiration if breathing is stopped. Keep at rest. Call for prompt medical attention.

**Ingestion**

If swallowed, DO NOT induce vomiting. If individual is conscious, give milk or water to dilute stomach contents. Keep warm and quiet. Get immediate medical attention. DO NOT attempt to give anything by mouth to an unconscious person.

---

**SECTION 5:****FIRE FIGHTING MEASURES****Flash Point, °C**

100

**Extinguishing Media**

In case of fire use foam, carbon dioxide or dry chemical extinguishers.

**Special Fire-fighting Procedures**

Water jets should not be used directly on igniting products. Avoid spraying water directly into storage containers due to danger of over-boil. However, water may be used to cool exposed containers, structures and equipment adjacent to fire. Respiratory and eye protection required for fire-fighting personnel.

**Decomposition Products Under Fire Conditions**

Fumes, smoke, oxides of sulfur, nitrogen, carbon and other toxic gases may be formed.

**HINDUSTAN PETROLEUM CORPORATION LIMITED**  
**VISAKHA REFINERY**  
**MATERIAL SAFETY DATA SHEET**

---

**SECTION 6:****ACCIDENTAL RELEASE MEASURES**

---

**Land Spill**

Taking normal safety precaution, eliminate sources of ignition. Prevent additional discharge of material, if possible to do so without hazard. For small spills, implement cleanup procedures. For large spills, implement clean-up procedures and, if in public area, keep public away and advise authorities. Prevent liquid from entering sewers, water courses, or low

areas. Contain spilled liquid with sand or earth. Recover by pumping or with a suitable absorbent. If liquid is too viscous for pumping, scrape up. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

**Water Spill**

Use booms to confine spills immediately. Remove from water surface by skimming or with suitable adsorbents. If allowed by local authorities and environmental agencies, sinking and/or suitable dispersants may be used in non-confined waters. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

---

**SECTION 7:****HANDLING AND STORAGE**

---

**Handling Procedures**

Keep away from potential sources of ignition. Open container in a well ventilated area. Avoid breathing vapors. Keep containers closed when not in use. Wash thoroughly after handling. "Empty" containers and retain product residue (liquid or vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat, flame, sparks, static electricity or other sources of ignition; they may explode and cause death or injury. Empty drums should be completely drained, properly bunged and promptly returned to a drum re-conditioner, or properly disposed of.

**Storage Procedures**

Do not store near potential sources of ignition. Store in well-ventilated area. Odorous and toxic fumes may form from the decomposition of this product if stored at temperatures in excess of 60 °C for extended periods of time or if heat sources in excess of 70 °C are used.

---

**SECTION 8:****EXPOSURE CONTROLS/PERSONAL PROTECTION**

---

**Ventilation Procedures**

The use of local exhaust ventilation is recommended to control mists or vapors. Additional ventilation or exhaust may be required to maintain air concentrations below exposure limits.

**Gloves Protection**

Use chemical resistant gloves.

**Eye Protection**

Where contact may occur, wear safety glasses with side shields.

**HINDUSTAN PETROLEUM CORPORATION LIMITED**  
**VISAKHA REFINERY**  
**MATERIAL SAFETY DATA SHEET**

**Respiratory Protection**

Use NIOSH/MSHA approved full-face respirator with a combination organic vapor and high efficiency filter cartridge if the recommended exposure limit is exceeded. Use self-contained breathing apparatus for entry into confined space, for other poorly ventilated areas and for large spill clean-up sites.

**Clothing Recommendation**

Wear either a chemical protective suit or apron when potential for contact with material exists. Use neoprene or nitrile rubber boots when necessary to avoid contaminating shoes. Do not wear rings, watches or similar apparel that could entrap the material and cause a skin reaction.

---

**SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

---

**Specific Gravity at 15°C** 0.825-0.900

**Water Solubility** Insoluble

**Odor** Characteristic of petroleum products

**Appearance** Clear

**Viscosity at 40 °C, cSt** 15

**Viscosity at 100 °C, cSt** Not applicable

---

**SECTION 10: STABILITY AND REACTIVITY**

---

**Stability** This product is stable and hazardous polymerization will not occur. However, the product should not be heated above 70 °C to avoid possible release of highly toxic hydrogen sulfide and odorous alkyl mercaptans.

**Incompatibility** Strong oxidizing agents

**Polymerization** Not Applicable

**Hazardous Decomposition Products** Hydrogen Sulfide (toxic)

---

**SECTION 11: TOXICOLOGICAL INFORMATION**

---

**Acute:****Inhalation**

Negligible hazard under ambient temperature conditions (-18 to 38 °C; 0 to 100 °F). If overheated especially in the presence of water, hydrogen sulfide may be released. This can cause respiratory collapse, coma, even death without necessarily any odor being sensed. Avoid breathing vapor or mists. Repeated and prolonged over-exposure to oil mists may result in

**HINDUSTAN PETROLEUM CORPORATION LIMITED

MATERIAL SAFETY DATA SHEET**

droplet deposition, oil granuloma formation, inflammation and increased incidence of infection.

<b>Skin Contact</b>	Low order of toxicity. Frequent or prolonged contact may cause mild skin discomfort.
<b>Eye Contact</b>	Will cause eye discomfort; may injure eye tissue if not removed promptly.
<b>Ingestion</b>	Minimal toxicity

---

**SECTION 12: ECOLOGICAL INFORMATION**

---

<b>Environmental Mobility</b>	Oil component of this product floats and can migrate from water to land.
<b>Environmental Degradability</b>	Data have not been determined specifically for this product, but it is not expected that it will be "readily" biodegradable.
<b>Ecotoxicity &amp; Bioaccumulation</b>	Data have not been determined specifically for this product, but it is expected to be harmful to aquatic organisms.

---

**SECTION 13: DISPOSAL CONSIDERATIONS**

---

<b>Waste Disposal</b>	Material, if discarded, is expected to be hazardous waste due to toxicity. Waste management should be in compliance with local and national regulations.
-----------------------	--

---

**SECTION 14: TRANSPORT INFORMATION**

---

<b>Land</b>	This product is not regulated for road/rail transport.
<b>Sea</b>	IMDG (Packaged Goods and BLCs). This product is not regulated for sea transport.
<b>Air</b>	(ICAO/IATA). This product is not regulated for air transport.

---

**SECTION 15: REGULATORY INFORMATION**

---

The chemical substances present in this product are included in, or exempted from the PICCS inventories.

---

**SECTION 16: OTHER INFORMATION**

---

This M.S.D.S and the information it contains is offered to you in good faith as accurate. We believe that information to be correct but cannot guarantee its accuracy or completeness.
